

Curriculum Vitae

Ken Kiers

Physics Department, Taylor University, 236 West Reade Ave.
Upland, IN 46989, USA

Fax: (765) 998-4844; Tel.: (765) 998-4689 (work)

E-mail: knkiers@tayloru.edu

Web Page: <http://www.css.tayloru.edu/~knkiers>

Personal:

- Birth: March 31, 1968 in St. Catharines, Ontario, Canada
- Citizenship: Canadian
- Marital Status: Married (spouse: Greta; children: Joshua, Joel, Benjamin, Leah)

Education and Employment:

- 2003-present: Associate Professor of Physics, Taylor University.
- 1998-2003: Assistant Professor of Physics, Taylor University.
- 1996-1998: Research Associate in the High Energy Theory Group at Brookhaven National Laboratory.
- 1991-1996: Ph.D. in Theoretical Particle Physics, University of British Columbia, Vancouver, Canada. Thesis: "A study of neutrino propagation and oscillations both in vacuum and in dense media," under Dr. N. Weiss.
- 1989-1991: B.Sc. in Physics, McMaster University, Hamilton, Canada.
- 1986-1989: Redeemer College (transferred to McMaster), Ancaster, Canada.

Scholarships, Fellowships and Awards:

- National Science Foundation (approx. \$88k over 3 years), 2006-present.
- Franklin W. and Joan M. Forman Distinguished Faculty Scholar Award (Taylor), 2004.
- National Science Foundation (approx. \$76k over 3 years), 2003-06.
- Cottrell College Science Award (Research Corporation, approx. \$24k), 2000-04.
- NSERC Postdoctoral Fellowship, 1996-98.
- UBC Graduate Fellowship, 1995-96.
- NSERC Post Graduate Scholarship B, 1993-1995.
- NSERC Post Graduate Scholarship A, 1991-1993.
- University "Top Up" (UBC), 1991-1992.
- NSERC Undergraduate Research Fellowship, Summer, 1991.
- Boyd McLay Scholarship in Physics (McMaster), 1990-1991.
- NSERC Undergraduate Research Fellowship, Summer, 1990.

Research Interests:

- My field is theoretical high energy physics. I have also done research in the fields of chaos and space science. I have made contributions to topics such as:
 - Left-Right Model: numerical studies of the quark, lepton and Higgs sectors of the model.
 - B and τ physics: low energy signals of new physics.
 - Supersymmetry: CP-violating signals in the decays of supersymmetric particles; signals of supersymmetry at an $e\gamma$ collider.
 - Chaos: precision measurements of chaos in simple circuits.
 - Space science: theoretical calculations for the DROPPS and SEPS experiments.
 - Neutrino physics: effects due to low energy neutrinos in dense stars; quantum mechanical issues concerning neutrino propagation and detection.
 - Scattering in one dimension: many-channel generalization of Levinson's theorem; time delay.
 - Anyon physics: study of the mean field approximation.
- **Current projects include:**
 - Triple product correlations in B decays (with D. London and others)
 - CP violation in hadronic τ decays (with D. London and others)
 - CP-violating signals in various supersymmetric particle decays (with D. London and others)

Courses Taught or Being Taught:

- PHY 203-204, Taylor University (Algebra-based Introductory Physics sequence)
- PHY 311, Taylor University (Modern Physics)
- PHY 313, Taylor University (Nuclear Radiation Exp. Methods; co-taught with H. Voss)
- PHY 342, Taylor University (Analytical Mechanics)
- PHY 370, Taylor University (Astrophysics; co-taught with B. Davis and D. Smith)
- PHY 412, Taylor University (Quantum Mechanics)
- PHY 413, Taylor University (Quantum Mechanics II)
- PHY 441, Taylor University (Advanced Mathematical Methods in Physics)
- IAS 493/PHY and ENP 493, Taylor University (Senior Seminar/Senior Capstone)
- ENP 370, Taylor University (GRE Preparation Course)
- NAS 220, Taylor University (one week of the Natural Sciences "Summer Honors" course)

Refereed Publications:

1. Alakabha Datta, Ken Kiers, David London, Patrick J. O'Donnell and Alejandro Szykman, "CP Violation in Hadronic τ Decays," hep-ph/0610162 (submitted to Physical Review D).

2. Ken Kiers, Alejandro Szynkman and David London, “CP violation in supersymmetric theories: $\tilde{t}_2 \rightarrow \tilde{t}_1 \tau^- \tau^+$,” Phys. Rev. D **74**, pp. 035004-1 to 035004-12, 2006 (hep-ph/0605123).
3. Ken Kiers, Michael Assis, David Simons, Alexey A. Petrov and Amarjit Soni, “Neutrinos in a left-right model with a horizontal symmetry,” Phys. Rev. D **73**, pp. 033009-1 to 033009-17, 2006 (hep-ph/0510274).
4. Ken Kiers, Michael Assis and Alexey A. Petrov, “Higgs sector of the left-right model with explicit CP violation,” Phys. Rev. D **71**, pp. 115015-1 to 115015-13, 2005 (hep-ph/0503115).
5. Ken Kiers, Tim Klein, Jeff Kolb, Steve Price and J.C. Sprott, “Chaos in a Nonlinear Analog Computer,” Int. J. Bif. Chaos **14**, pp. 2867-2873, 2004.

Publications in Conference Proceedings:

1. Ken Kiers and Michel H.G. Tytgat, "Energetics of neutrinos in neutron stars," proceedings of the 34th Rencontres de Moriond: Electroweak Interactions and Unified Theories, Les Arcs, France, Mar. 13-20, 1999 (hep-ph/9905532) (talk given by M. Tytgat).
2. Guo-Hong Wu, Ken Kiers and Amarjit Soni, "CP violation in B decays in a two-Higgs doublet model for the top quark," proceedings of the APS Meeting of the Division of Particles and Fields (DPF 99), Los Angeles, CA, Jan. 5-9, 1999 (hep-ph/9903343) (talk given by G.-H. Wu).
3. Ken Kiers and Michel H.G. Tytgat, "The neutrino ground state in a neutron star," Nucl. Phys. Proc. Suppl. **77**, pp. 445-449, 1999. (Proceedings of the 18th International Conference on Neutrino Physics and Astrophysics (Neutrino 98), Takayama, Japan, June 4-9, 1998; hep-ph/9807412) (talk given by K. Kiers).
4. Ken Kiers and Nathan Weiss, "Coherent neutrino propagation in a dense medium," proceedings of Strong and Electroweak Matter, Eger, Hungary, May 21-25, 1997 (hep-ph/9709451) (talk given by N. Weiss).

Presentations:

- "Chaos in a simple electronic circuit," Feb. 21, 2006, "Midi-Pizza" seminar at the Université de Montréal.

- “Neutrinos and Higgs bosons in the left-right model,” Feb. 10, 2006, Montreal Joint High Energy Physics Seminar, at the Université de Montréal.
- “Neutrinos in the left-right model... and a bit of chaos,” Nov. 15, 2005, Physics and Astronomy Department Seminar, Calvin College.
- “Higgs sector of the left-right model with explicit CP violation,” May 5, 2005, at Pheno2005, Madison, WI.
- “Neutrinos in the left-right model... and a bit of chaos,” Feb. 24, 2005, Physics Department Colloquium, Ball State University.
- “Neutrinos in the left-right model,” Nov. 12, 2004, High Energy Nuclear/Particle Physics Seminar Series, Wayne State University.
- “Chaos in a Simple Electronic Circuit,” Aug. 6, 2003, at the 127th AAPT National Meeting, Madison, WI.
- “A Simple Chaotic Circuit,” Aug. 4, 2003, poster session at the 127th AAPT National Meeting, Madison, WI.
- “A top-inspired left-right model,” Oct. 21, 2002, Science Seminar Series, Taylor University.
- “Ubiquitous CP violation in a top-inspired left-right model,” May 25, 2002, at DPF2002, College of William & Mary, Williamsburg, VA.
- “Ubiquitous CP violation in a top-inspired left-right model,” April 23, 2002, at Pheno2002, Madison, WI.
- “A top-inspired left-right model,” March 20, 2002, Physics Department Colloquium Series, Taylor University.
- “A top-inspired left-right model,” March 7, 2002, Ball State University Physics Department seminar.
- “CP violation in B Physics,” Apr. 26, 2000, Physics Department, Taylor University
- “Higgs-mediated CP violation in radiative b decays,” Apr. 17, 2000, at Pheno 2000 Symposium: Phenomenology for the Nu Century, Apr. 17-19, 2000, Madison.
- “Neutrino Oscillations,” Sept. 20, 1999, Science Seminar Series, Taylor University.
- “The neutrino ground state in a neutron star,” Jan. 18, 1999, Particle Theory Seminar, University of British Columbia.
- “The neutrino ground state in a neutron star,” June 9, 1998, at the 18th International Conference on Neutrino Physics and Astrophysics (Neutrino 98), June 4-9, 1998, Takayama, Japan.
- “The neutrino ground state in a neutron star,” May 12, 1998, Physics and Astronomy Colloquium, McMaster University.
- “The neutrino ground state in a dense star,” Apr. 7, 1998, at the Center for High Energy Physics, McGill University.
- “The neutrino ground state in a dense star,” Apr. 6, 1998, to the theory group at the Université de Montréal.
- “The neutrino ground state in a dense star,” Mar. 24, 1998, at Pheno-CTEQ Symposium

98: Frontiers of Phenomenology from Non-perturbative QCD to New Physics, Mar. 23-26, 1998, Madison.

· “The neutrino ground state in a dense star,” Feb. 23, 1998, at the Center for Theoretical Physics, MIT.

· “ B decays and the search for new physics,” June 23, 1997, to the theory group at McMaster University.

· “ T -odd observables in semileptonic B decays,” Mar. 19, 1997, at the BaBar Physics Workshop, Mar. 17-20, 1997, Princeton University.

· “ T -odd observables in semileptonic B decays,” Mar. 17, 1997, at Pheno97: Recent Developments in Phenomenology, Mar. 17-19, 1997, Madison.

· “Exclusive B decays and the search for new physics,” Mar. 3, 1997, at the ITP, Stony Brook.

Memberships:

- American Physical Society
- American Association of Physics Teachers

Other Professional Activities:

- Chair, Physics and Astronomy Section of the Indiana Academy of Science (2002-2003).
- Chair, Physics and Astronomy Section of the Indiana Academy of Science (2004-2005).
